

Float like a butterfly, pound like a MF*

We are proud to announce that Musical Fidelity has won the prestigious EISA award for 2023/2024 in the category "High-End Integrated Amplifier".

OFFICIAL EISA Award citation :

This flagship integrated amp adopts the core form and

function of its highly respected predecessor while showcasing performance and aesthetic improvements. Combining solid-state power amplification with nuvisor tube-based input and driver stages, Musical Fidelity's hybrid offers a best-of-both worlds sound: smooth and musical with cavernous soundstaging, but also glori-

ously aggressive and weighty when required. Driving ability also startles – this 2x330W-rated amp will handle any loudspeaker that crosses its path – while the reimagined front-panel display makes operation easy. The Nu-Vista 800.2 is a fantastic addition to Musical Fidelity's top-flight line-up, and a must-hear for any music-lover.
